# MEGALAC

---

## Consistent energy.

MEGALAC<sup>®</sup> helps to enhance herd productivity by delivering rumen bypass fat to the small intestine. This provides the extra energy needed to achieve peak production levels and to maintain production post-peak.

---

MEGALAC is the first bypass fat and most efficient energy source on the market. First introduced in 1986, MEGALAC remains the industry standard and is the only bypass fat with a USDA measured Net Energy for Lactation (NEL) value, 2.96 Mcal/lb.

- Maintains consistent performance
- Helps animals regain and maintain body condition
- Delivers additional energy to the small intestine

Nobody would choose style over substance and glitz over proof, right? Well, you know, nobody other than the guy in this video. More than 50 MEGALAC® Rumen Bypass Fat research trials weren't enough to convince him, but they definitely show that MEGALAC remains the clear choice for improving herd performance and producer profitability. Ask for it by name.
